About

I am a creative technologist, interaction designer and design researcher passionate about making things you can touch, play with and get immersed in. I just finished a PhD in Interaction Design and have a background in Software Engineering and Human-Centred AI. I design and build interactive artefacts, installations and experiences that explore how technology can invite us to participate, create, play and pay attention to the world around us. My biggest strength is my range of skills, which lets me turn an idea into a working artefact, whether it's digital or something you can hold in your hands, and whether it means writing code, wiring electronics, designing sound and visuals, or getting hands-on with physical prototyping.

Selected work

Tubularium (2024)

An interactive music system of seven glowing tubes that lets non-musicians make melodies with their whole body.

Picnic (2025)

An interactive music installation that turns the objects inside a picnic basket into instruments for making rhythms using machine learning.

Table Manners (2026)

An interactive music experience that invites people to make music playfully by striking giant dinnerware and using their voices.

Experience

PhD Fellow

IT University of Copenhagen, May 2023 - Nov 2026
Research, Concept design & development, Teaching, Supervising

Creative Technologist

Futures Lab Schibsted, Oslo, Jun - Aug 2023
Concept design & development

Creative Technologist (intern)

Kaspar AI, Copenhagen, Mar - Apr 2023
AI based development

Mobile App Developer

CACHET, Copenhagen, Oct 2020 - Aug 2022
App development, UX & UI Design

Education

PhD in Interaction Design (thesis submitted)

IT University of Copenhagen, 2023-2026

MSc in Human Centered AI

Technical University of Denmark, 2020-2022

BSc in Software Engineering

University of Technology, Art & Design (Madrid), 2016-2020

Skills

Design

Interactive installations
Tangible interaction
Audiovisual interaction
AI-based interaction
Concept development
UX/UI
User journeys and personas

Build

Physical computing
Creative coding
Prototyping & fabrication
Web & app development
Agentic AI workflows

Research

User research & testing
Workshop facilitation
Qualitative analysis

Toolbox

Max/MSP, TouchDesigner
Arduino, Raspberry Pi, ESP32
Python, JavaScript, React
p5.js, Three.js
Figma, Premiere Pro
Fusion 360
Ableton

Languages

Spanish (native)
English (fluent)
Danish (intermediate)
