About

I am a creative technologist and researcher passionate about making things you can touch, play with and get immersed in. With a technical background and creative and humanistic interests, I design and build interactive artifacts, to explore how can technology invite us to participate, create, play and pay attention to the world around us. I thrive in maker spaces where I can prototype ideas and test them in the real world.

Research

Designing Musicking Artefacts

Technology has transformed how we experience music, but often fails to consider the embodied nature of music, making us become passive to musical experiences. My research explores, through tangible artefacts, how to facilitate playful, embodied and active music experiences. So far I've designed two artefacts: Tubularium, focused on supporting non-musicians engage in aesthetic music experiences; and Picnic focused into facilitating playful music making using AI as design material and everyday objects.

Experience

PhD Fellow

IT University of Copenhagen, May 2023 - Oct 2026

Research, Concept design & development, Teaching, Supervising

Creative Technologist

Futures Lab Schibsted, Oslo, Jun - Aug 2023

Concept design & development

Creative Technologist (intern)

Kaspar AI, Copenhagen, Mar - Apr 2023

AI based development

Mobile App Developer

CACHET, Copenhagen, Oct 2020 - Aug 2022

App development, UX & UI Design

Education

PhD in Interaction Design (currently)

IT University of Copenhagen, 2023-2026

MSc in Human Centered AI

Technical University of Denmark, 2020-2022

BSc in Software Engineering

University of Technology Art & Design (Madrid), 2016-2020

Skills

Interaction Design
Concept development
Digital prototyping
Physical computing
Sound-based Design
AI Based Applications
Speculative Design
App Development
User Research

Toolbox

Max/MSP/Jitter
Processing
Python
Arduino
Figma
Flutter
JS
HTML/CSS

Languages

Spanish (native)
English (fluent)
Danish (intermediate)
